PROJECTS

ISSUE COLLAB ▪ issue-collab.netlify.com

A search tool for GitHub issues built with React, allowing the user to narrow down issues by labels and languages with convenient toggle switches. Inspired by a desire to find open source projects to contribute to.

BILLTRACKER ▪ git.io/fhI0F

Full-stack fully-responsive SPA including authentication built with React and Express. Allows users to create, edit, and delete expenses in a table view.

WD NEWS + TIPS ▪ timrybicki.com/blog

Jekyll-based blog for sharing development resources. Topics include using terminal aliases, productivity tips for Git, and SSH configurations.

EXPERIENCE

JAVASCRIPT ENGINEER at F1V LLC

Waltham, MA ▪ November 2018 – present

- Implement feature and design stories for large education company's learning platform built in React/Redux using Scrum methodologies
- Create re-usable components such as Drag and Drop Upload while writing unit and feature tests with Jest and Puppeteer
- Work closely with Product and Design teams to ensure stories are completed accurately and on time

WEB DEVELOPMENT FELLOWSHIP at GENERAL ASSEMBLY

Boston, MA ▪ July 2018 – October 2018

- Full-time 3-month career accelerator focused on JavaScript and Node
- Gained knowledge of industry best practices and developed three full-stack applications

IT SUPPORT SPECIALIST at FOLEY HOAG LLP

Boston, MA ▪ January 2017 – July 2018

- Provided expert technical support for high-profile lawyers and executives while being reachable 24x7 during on-call rotation

TECHNICAL SUPPORT SPECIALIST at MINDSHIFT

Waltham, MA ▪ August 2015 – November 2016

- Resolved SMTP and DNS issues through independent research for Microsoft Exchange SaaS product
